Fibreglass Fitter

Location: Edmonton, Alberta **Education:** Grade 12 Diploma

Responsibilities:

Fibreglass Fitters are responsible for assembling, fitting and installing fibreglass parts for ZCL's FRP storage solutions including:

- Reading blueprints and drawings to determine custom fitting requirements
- Marking out areas for custom fitting installation
- Using various hand tools to perform fibreglass lamination activities to install custom fittings
- Other duties as required

Required Qualifications:

- Grade 12 diploma or equivalent with previous fitting experience
- Ability to read and follow blueprint specifications and drawings
- Good math skills in order to accurately interpret blueprints and drawings
- Good understanding of the English language including verbal, written, and reading skills
- Ability to communicate effectively with others and work as part of a team
- Good problem-solving skills and attention to detail
- Comfortable working in a plant environment
- Ability to work at heights and within confined spaces when required
- Ability to work variable hours including shift work

Additional Information

- Successful candidates will be required to supply their own steel-toed safety boots (company allowance provided after 6 months of employment)
- Successful candidates should have their own transportation as public transportation is not readily available
- Previous fibreglass experience would be an asset; however, ZCL welcomes candidates with transferable knowledge from other industries
- Physical capabilities include bending, crouching, kneeling, and the ability to stand for extended periods of time

This is a permanent full-time position in ZCL's Main Plant in Edmonton located at 6907 – 36th Street. We thank all applicants for their interest, but only those candidates selected will be contacted.

To apply for this position, please email your resume to jobs@zcl.com.
