

Canada's #1 fiberglass tank manufacturer

ZCL Composites Inc.

# PINNACLE

## The ultimate storage tank package...

Now you can get all the long lasting, user friendly features of our popular PROTEKTORII™ in a new cost effective vertical design.

The **PINNACLE** is a **100% secondary containment tank** that allows you to comply with current environmental regulations for less, while greatly reducing your risk of expensive leak-related clean-ups over the long haul. Like all ZCL tanks, the **PINNACLE** is made from **corrosion resistant fiberglass**, using the same "best quality" resins, components and accessories as our top selling PROTEKTORII.™

## Now more affordable...

The only difference, **PINNACLE** conforms with recent changes to government guidelines for **100% secondary containment**. Simply put, it cost us less to make. The resulting **savings are passed directly to you**, reducing your cost. You get the same safe, durable technology that the oil patch has come to expect from ZCL's products, **plus more than twice the service life** of bare steel tanks.

Easily accessible inlet and discharge piping.

Additional features include; concrete pad with bolts in place, calibrated mechanical liquid level gauge, thief hatch, battery cables, ground wire and screened vents.

- Fiberglass primary storage & 100% secondary containment
- Gas fired integral heating system
- Engineered precast concrete mounting pad
- Integral static grounding system
- Moveable and reusable
- Urethane foam insulation with UV inhibitor coating
- Corrosion resistant to produced water & most chemicals
- "Go-No-Go" leak indicator
- Enclosed outlet piping assembly
- Integral 1 to 1 mechanical EZ-Read level gauge
- Minimal site preparation required
- Meets G-55 Guidelines
- Common sizes from 25 BBL – 250 BBL.

Corrosion resistant to produced water and most chemicals

Quick and easy set-up, less than an hour typically required

Easy to move and reuse (1/2 the weight of other tanks)

## The corrosion free advantage...

Corrosion Free...100% premium grade double wall Fiberglass Reinforced Plastic (FRP) construction (no filler) provides corrosion free internal and external service. ZCL tanks are suitable for any Hydrogen Sulfide content at 140° F.

## User friendly, peak performance...

Years of valuable customer input has resulted in tank designs that are perhaps the most user friendly on the market! Incorporating dozens of suggestions from oilfield experts, the **PINNACLE** is easier to use, safer for the environment and longer lasting than other aboveground tanks.
