COMPOSITES INC.

**THE FIBERGLASS TANK THAT SIMPLY WILL NEVER RUST!**

## NEVER WORRY ABOUT COSTLY TANK LEAKS AGAIN

Guaranteed long-term, trouble-free service...

Leaks can be costly. A rusting fuel storage tank could end up costing you anywhere from \$20,000 to \$200,000 or more in environmental cleanup costs! The problem... condensation, humid air, sludge and salt are constantly eating away at older steel tanks, often causing dangerous rust leaks. Internal rust damage is hard to detect, and not

usually visible until it's too late. The solution... **The Safer Tank™ from ZCL, it simply will never rust.** It doesn't require containment walls and is weather-proof to allow either indoor or outdoor installation. Plus it comes with a 30 year warranty that guarantees you long-term, trouble-free service!

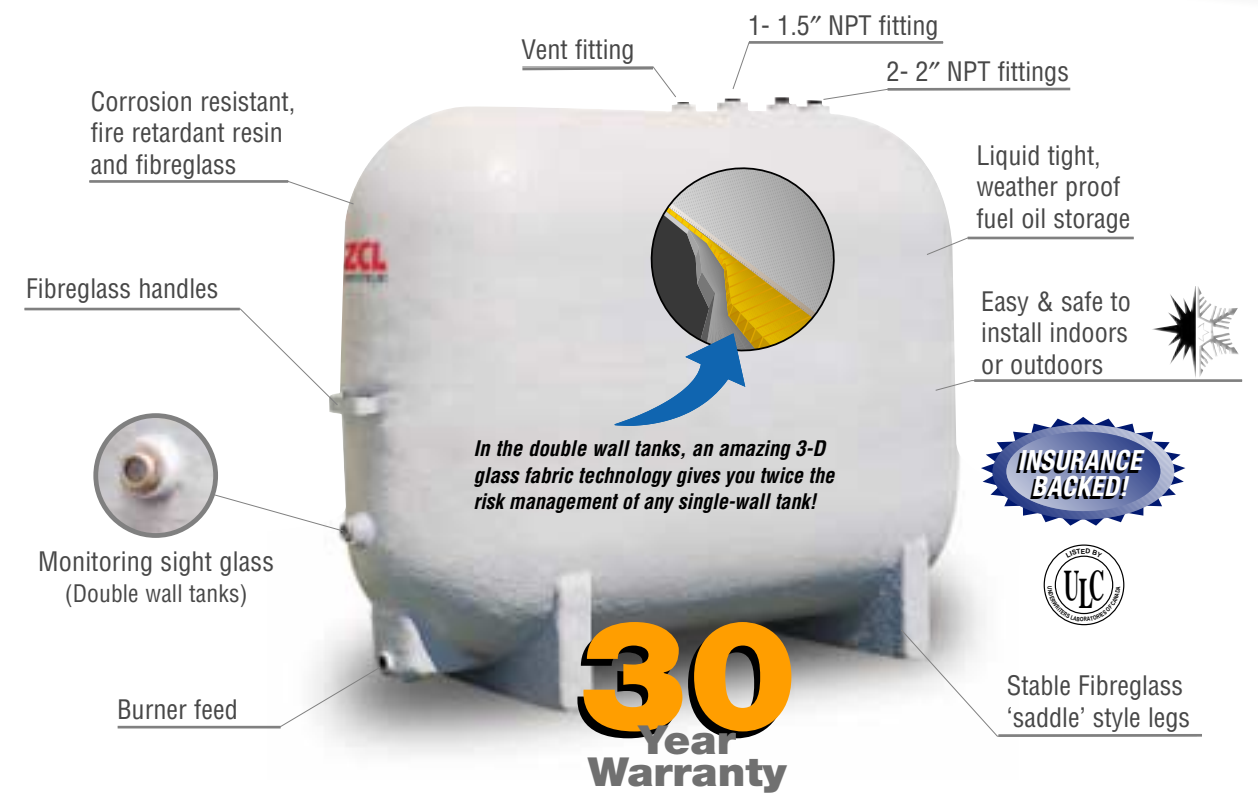

Choose from single or double wall protection...

Tanks are available in double or single wall designs and can be installed alone or in groups with common filling and venting pipes for supplying a central heating system.

In the double wall tanks, two walls of protection allow for maximum security in the unlikely event of a leak in the primary wall. A visual sight-glass lets you inspect the integrity of your double wall storage tank at any time.

### SPECIFICATIONS

<ul style="list-style-type: none"> <li>• Holding capacities of 200 or 250 Gal in both double or single wall designs</li> <li>• 2x2" NPT fittings and 1x1.5" NPT fitting</li> <li>• Convenient side or top burner feed</li> <li>• Fibreglass saddles (legs) for better stability</li> <li>• Fibreglass handles for easy and safe handling</li> <li>• Visual sight-glass monitoring (double wall tanks)</li> </ul>	Standard models	L	W	H	Weight
	200G s/w	65"	24"	53"	175lbs
	200G d/w	65"	24"	53"	195lbs
	250G s/w	79.75"	24"	53"	190lbs
	250G d/w	79.75"	24"	53"	215lbs

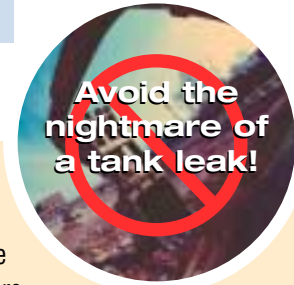

**Designed to deliver more than twice the service life of other tanks!**

## THE ONLY TANK THAT GUARANTEES LONG TERM PEACE OF MIND!

Now the worry of a leak caused by unseen corrosion associated with older model tanks is virtually eliminated. Our double wall tank system has unprecedented reliability and is backed by an

'Enhanced Warranty' that provides up to \$1.0 million on-site clean-up coverage for 10 years from date of purchase! (Please refer to warranty certificate for details.)

### Rust facts...

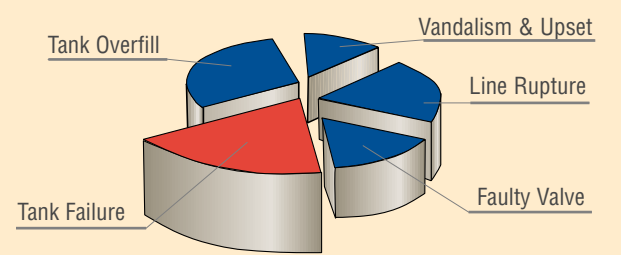

Nearly all fuel oil tanks rust from the inside out. Because of condensation, water and sludge accumulates at the bottom of the tank. This in turn can cause internal rust, which is generally not visible. Leaking tanks are also a result of improper tank maintenance, damp locations and

damage. Outdoor installations are more susceptible to condensation as a result of day-night temperature changes. Outside rust is noticeable by the small pinholes on the exterior of the tank. **A ZCL tank on the other hand, is made from 100% fibreglass and simply will never rust, inside or out!**

### Causes of Leaks...

Oil leaks from residential heating oil tank systems at private homes **account for nearly 40% of reported annual leaks.** Leaking storage tanks account for a high percentage of all heating oil leaks.

### TOP 5 CAUSES OF FUEL OIL LEAKS

the  
**safer**  
tank™

CANADA'S #1 FIBREGLASS  
TANK MANUFACTURER.

## YOUR ASSURANCE OF QUALITY...

*ZCL Composites Inc. is the most trusted name in the petroleum industry for environmentally safe storage of petroleum products.*

### Quality Design

- Corrosion resistant design gives you more than twice the tank life when compared to other tanks. It's your safest and most economical bet over the long haul and likely the last tank you'll ever have to buy!
- Manufactured in Canada using 100% quality, UV and fire resistant fibreglass/resins.
- Liquid tight construction with 100% leak free joints.
- Stable fibreglass saddle stands.
- Weather proof design – can be installed inside or outside and does not require any containment walls.
- Factory installed sight-glass for easy visual monitoring on Double Wall Tanks only
- Convenient side or top feed options.

### Quality Assured

- Every tank is factory performance tested, no "rubber stamp inspections"
- Every tank conforms to Underwriters Laboratories of Canada (ULC) specifications for Aboveground Non-Metallic Tanks for Fuel Oil—ULC C80.1-2000

**Tanks are ULC listed for diesel storage for standby generators.**

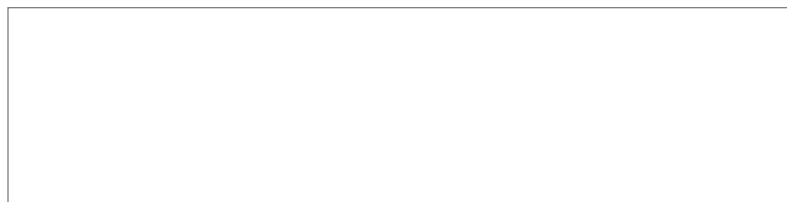

### 30 Year Warranty

- Tanks come with a 30 year limited warranty against leaks caused by corrosion.
- The double wall system has an enhanced warranty that provides up to \$1.0 million on-site clean-up coverage for 10 years from date of purchase. Please refer to warranty certificate for details.
